

# Diamondback 4-12x40

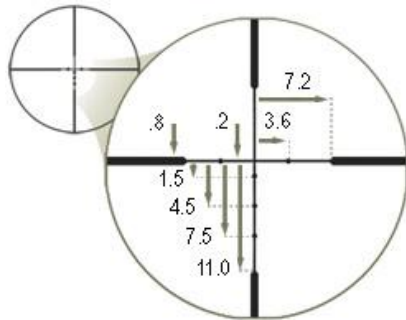

## Diamondback 4-12x40 Rifle Scope

The Diamondback—loaded with features! First, the solid one-piece aircraft-grade aluminum alloy construction makes the Diamondback rifle scope virtually indestructible and highly resistant to magnum recoil. Argon purging puts waterproof and fogproof performance on the agenda, and advanced fully multi-coated optics raise an eyebrow when crystal clear, tack-sharp images appear in the crosshairs. Look for all this and more in a rifle scope you'd expect to cost quite a bit more-but doesn't. We can live with that.

- 4-12x40 rifle scope is ideal for big game, predator/varmint, muzzleloader, slug shotgun, and long range applications.
- Dead-Hold BDC reticle has a customized design that helps eliminate guesswork on hold-over and windage corrections. Good for any hunting or shooting at varying ranges where estimating hold-over would be a concern.
- MSRP: \$269.00

Magnification 4-12 x Objective Lens Diameter 40 mm  
Eye Relief 3.1-3.4 inches Field of View 32.4-11.3 feet/100 yards Tube Size 1 inch Turret Style Low capped
