

Here is the knife that I made for your SCI event. I am a life member of the SCI national chapter and an annually member of the Minnesota, Minneapolis chapter. **The knife is hand ground from ATS 34 steel with a Rockwell hardness of 61 . The handle is Buffalo horn and the pin and bolsters are brass. I also made the sheath which is vegetable tanned cow hide.** I am looking forward to attending your event.

Regards,
Allen Hochhauser
