

Wildlife Hunting Pond

\$6,999 Value - Pond Squad is donating a Wildlife Hunting Pond to be constructed on your property.

This donation includes 1- 30 ft. round pond excavated to approximately 8 ft. deep, lined with natural bentonite clay, as well as finish grading and seeding around the perimeter of the pond. This donation does not account for clearing trees or the water source to fill and maintain optimal water levels within the pond; however most customers rely on runoff from rain water or have a dedicated water source (ie: milk truck garden hose or well) for filling and maintaining their ponds. This item may be upgraded to larger ponds or lakes or more decorative ponds and waterfalls. Please contact Pond Squad prior to bidding if the site you wish to place this pond is within 500 feet of a wetland, stream or public waterway as there may be additional fees. www.pondsquad.biz
